**Alumni Feedback Analysis Report**

- Q 1:** Ability to apply fundamental subject knowledge to new problems.  
**Q 2:** Ability to analyse complex engineering problems.  
**Q 3:** Ability to design creative, original and cost effective solutions for engineering problems.  
**Q 4:** Ability to innovate solutions for complex engineering problems  
**Q 5:** Ability to use computers and software as an analytical tool.  
**Q 6:** Ability to provide engineering solutions to societal problems.  
**Q 7:** Sensitivity to environment and sustainability in engineering practice.  
**Q 8:** Ability to cope with complex moral and ethical issues in professional life.  
**Q 9:** Ability to work in a team and as a leader.  
**Q 10:** Ability to manage projects in multidisciplinary environments.  
**Q 11:** Ability to write well and effectively communicate orally  
**Q 12:** Ability to participate in career advancement programs
- Q 13:** Feasibility of Civil Engineering Projects: Conduct surveys and site investigations for Civil Engineering projects and prepare feasibility reports.  
**Q 14:** Analysis and Design in Civil Engineering: Plan, analyse and design Civil Engineering solutions giving due consideration to society, cost, safety and sustainability.  
**Q 15:** Execution of Civil Engineering Projects: Supervise, test and evaluate construction of structures, materials, manage resources and maintenance of structures.

Percentage of Positive response (CE)

- Q 1: Ability to apply fundamental subject knowledge to new problems.  
Q 2: Ability to analyse complex engineering problems.  
Q 3: Ability to design creative, original and cost effective solutions for engineering problems.  
Q 4: Ability to innovate solutions for complex engineering problems.  
Q 5: Ability to use computers and software as an analytical tool.  
Q 6: Ability to provide engineering solutions to societal problems.  
Q 7: Sensitivity to environment and sustainability in engineering practice.  
Q 8: Ability to cope with complex moral and ethical issues in professional life.  
Q 9: Ability to work in a team and as a leader.  
Q 10: Ability to manage projects in multidisciplinary environments.  
Q 11: Ability to write well and effectively communicate orally.  
Q 12: Ability to participate in career advancement programs.  
  
Q 13: The ability to implement, analyze and develop algorithms based on computational theory in the fields computer science for productive and effective design of computer-based systems.  
Q 14: The ability to apply standard engineering practices for the development and management of software and hardware projects, using open source programming environments.

**<Question>**

**Q 1:** Ability to apply fundamental subject knowledge to new problems.

**Q 2:** Ability to analyse complex engineering problems.

**Q 3:** Ability to design creative, original and cost effective solutions for engineering problems.

**Q 4:** Ability to innovate solutions for complex engineering problems.

**Q 5:** Ability to use computers and software as an analytical tool.

**Q 6:** Ability to provide engineering solutions to societal problems.

**Q 7:** Sensitivity to environment and sustainability in engineering practice.

**Q 8:** Ability to cope with complex moral and ethical issues in professional life.

**Q 9:** Ability to work in a team and as a leader.

**Q 10:** Ability to manage projects in multidisciplinary environments.

**Q 11:** Ability to write well and effectively communicate orally.

**Q 12:** Ability to participate in career advancement programs.

**Q 13:** Students at the time of graduation will be competent to solve real life problems related to electrical machines, power converters, power systems, controllers, electrical estimation, energy management and auditing.

**Q 14:** Students at the time of graduation will have programming skill and ability to use modern software tools to analyse and design electrical and electronic systems.

**Q 15:** Students at the time of graduation will have hands on proficiency in analog and digital electronics, embedded systems, for the control, operation and maintenance of electrical and electronic system.

### <Question>

Q 1: Ability to apply fundamental subject knowledge to new problems.

Q 2: Ability to analyse complex engineering problems.

Q 3: Ability to design creative, original and cost effective solutions for engineering problems.

Q 4: Ability to innovate solutions for complex engineering problems.

Q 5: Ability to use computers and software as an analytical tool.

Q 6: Ability to provide engineering solutions to societal problems.

Q 7: Sensitivity to environment and sustainability in engineering practice.

Q 8: Ability to cope with complex moral and ethical issues in professional life.

Q 9: Ability to work in a team and as a leader.

Q 10: Ability to manage projects in multidisciplinary environments.

Q 11: Ability to write well and effectively communicate orally.

Q 12: Ability to participate in career advancement programs.

Q 13: Ability to apply the concepts of engineering to design components and systems for applications in electronics, control system, process and industrial instrumentation, signal processing and other related areas of engineering.

Q 14: Hands-on experience in application of engineering hardware and software tools to solve complex Electrical, Electronics and Instrumentation Engineering problems.

**Alumni Feedback Analysis Report**

**1. Computational Knowledge:**

Apply knowledge of mathematics, computing fundamentals, principles of management, software engineering concepts and application development knowledge appropriate for the computing specialization

**2. Problem Analysis:**

Identify, formulate, design and develop applications to analyze and solve computer science related problems

**3. Design/Development of Solutions:**

Design and Evaluate a computer based system, components and process to meet the specific needs of applications on societal and environmental aspects

**4. Conduct investigations of complex Computing problems:**

Use appropriate review literatures, research methodologies, techniques and tools, design, conduct experiments, analyze and make inferences from the resulting data.

**5. Modern Tool Usage**

Create, Select, Integrate and apply efficiently appropriate techniques, resources, and modern computing tools to solve complex problem, with an understanding of the limitations.

**6. Professional Ethics:**

Understand and work with a professional context pertaining to ethics with appropriate societal and cyber regulations in a global economic environment

**7. Life-long Learning:**

Recognize and develop the passion for a continued career development and progress as a computer professional

**8. Project management and finance:**

Apply the principles of management with computing knowledge to manage the projects effectively both as a team leader and team member on multidisciplinary environments

**9. Communication Efficacy:**

Communicate effectively with the computing community as well as society by being able to make effective presentations and design documentation with respect to appropriate standards.

**10. Societal and Environmental Concern:**

Ability to utilize the computing knowledge efficiently in projects to analyze the global and local impact of business solutions for societal, environmental, and cultural aspects

**11. Individual and Team Work:**

Develop the ability to act as a member or leader for the fulfillment of diverse teams in multidisciplinary environments.

**12. Innovation and Entrepreneurship:**

Develop and design innovative methodologies to create value as a successful entrepreneur and wealth for betterment of individual and society at large.
